As these data are collected as part of the supervisory process, they are subject to confidential treatment under exemption 8 of the Freedom of Information Act (FOIA) (5 U.S.C. § 552(b)(8)). In addition, commercial and financial information contained in these information collections may be exempt from disclosure under exemption 4 of FOIA (5 U.S.C. § 552(b)(4)), if disclosure would likely have the effect of (1) impairing the government's ability to obtain the necessary information in the future, or (2) causing substantial harm to the competitive position of the respondent. Such exemptions would be made on a case-by-case basis.

Abstract: The data collected through the FR Y-14A/Q/M schedules provide the Federal Reserve with the additional information and perspective needed to help ensure that large BHCs have strong, firm-wide risk measurement and management processes supporting their internal assessments of capital adequacy and that their capital resources are sufficient given their business focus, activities, and resulting risk exposures. The annual Comprehensive Capital Analysis and Review (CCAR) exercise is also complemented by other Federal Reserve supervisory efforts aimed at enhancing the continued viability of large BHCs, including continuous monitoring of BHCs' planning and management of liquidity and funding resources and regular assessments of credit, market and operational risks, and associated risk management practices. Information gathered in this data collection is also used in the supervision and regulation of these financial institutions. In order to fully evaluate the data submissions, the Federal Reserve may conduct follow up discussions with or request responses to follow up questions from respondents, as needed.

The Capital Assessments and Stress Testing information collection consists of the FR Y-14A, Q, and M reports. The semi-annual FR Y-14A collects information on the stress tests conducted by BHCs, including quantitative projections of balance sheet, income, losses, and capital across a range of macroeconomic scenarios, and qualitative information on methodologies used to develop internal projections of capital across scenarios.³ The quarterly FR Y-14Q and the monthly FR Y-14M are used to support supervisory stress test models and for continuous monitoring efforts. The quarterly FR Y-14Q collects granular data on BHCs' various asset classes, including loans, securities and trading assets, and PPNR for the reporting period. The monthly FR Y-14M comprises three retail loan- and portfolio-level collections, and one detailed address matching collection to supplement two of the portfolio and loan-level collections.

Frank Act (12 U.S.C. § 5365), and section 252.153(b)(2) of Regulation YY (12 CFR 252.153(b)(2)).

FR Y-7: Sections 8(a) and 13(a) of the IBA (12 U.S.C. 3106(a) and 3108(a)) and sections 113, 312, 618, and 809 of the Dodd-Frank Act (12 U.S.C. 5361, 5412, 1850a(c)(1), and 5468(b)(1), respectively).

FR Y-10 and FR Y-10E: Sections 4(k) and 5(c)(1)(A) of the BHC Act (12 U.S.C. 1843(k), 1844(c)(1)(A)), section 8(a) of the IBA (12 U.S.C. 3106(a)), sections 11(a)(1), 25(7), and 25A of the Federal Reserve Act (12 U.S.C. 248(a)(1), 321, 601, 602, 611a, 615, and 625), and sections 113, 312, 618, and 809 of the Dodd-Frank Act (12 U.S.C. §§ 5361, 5412, 1850a(c)(1), and 5468(b)(1), respectively).

The data collected in the FR Y-6, FR Y-7, FR Y-10, and FR Y-10E are not considered confidential. With regard to information that a banking organization may deem confidential, the institution may request confidential treatment of such information under one or more of the exemptions in the Freedom of Information Act (FOIA) (5 U.S.C. 552). The most likely case for confidential treatment will be based on FOIA exemption 4, which permits an agency to exempt from disclosure “trade secrets and commercial or financial information obtained from a person and privileged and confidential,” (5 U.S.C. 552(b)(4)). To the extent an institution can establish the potential for substantial competitive harm, such information would be protected from disclosure under the standards set forth in National Parks & Conservation Association v. Morton, 498 F.2d 765 (D.C. Cir. 1974). Exemption 6 of FOIA might also apply with regard to the respondents’ submission of non-public personal information of owners, shareholders, directors, officers and employees of respondents. Exemption 6 covers “personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy,” (5 U.S.C. 552(b)(6)). All requests for confidential treatment would need to be reviewed on a case-by-case basis and in response to a specific request for disclosure.

Abstract: The FR Y-6 is an annual information collection submitted by top-tier holding companies and non-qualifying FBOs. It collects financial data, an organization chart, verification of domestic branch data, and information about shareholders. The Federal Reserve uses the data to monitor holding company operations and determine holding company compliance with the provisions of the BHC Act, Regulation Y (12 C.F.R. 225), the Home Owners’ Loan Act (HOLA), and Regulation LL (12 C.F.R. 238).

The FR Y-7 is an annual information collection submitted by qualifying FBOs to update their financial and organizational information with the Federal Reserve. The FR Y-7 collects financial, organizational, and managerial information. The Federal Reserve uses information to assess an FBO’s ability to be a continuing source of strength to its U.S. operations, and to determine compliance with U.S. laws and regulations.

The FR Y-10 is an event-generated information collection submitted by FBOs; top-tier holding companies; security holding companies as authorized under Section 618 of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (12 U.S.C. 1850a(c)(1)); state member banks unaffiliated with a BHC; Edge Act and agreement corporations that are not controlled by a

member bank, a domestic BHC, or a FBO; and nationally chartered banks that are not controlled by a BHC (with regard to their foreign investments only) to capture changes in their regulated investments and activities. The Federal Reserve uses the data to monitor structure information on subsidiaries and regulated investments of these entities engaged in banking and nonbanking activities. The FR Y-10E is a free-form supplement that may be used to collect additional structural information deemed to be critical and needed in an expedited manner.

If a respondent considers the information to be trade secrets and/or privileged such information could be withheld from the public under the authority

of the Freedom of Information Act, 5 U.S.C. 552(b)(4). Additionally, to the extent that such information may be contained in an examination report such information maybe also be withheld from the public, 5 U.S.C. 552 (b)(8).

Abstract: The Risk Based Capital Standards: Advanced Capital Adequacy Framework Information Collection (FR 4200) collects information relating to the regulatory capital rule (12 CFR part 217). The regulatory capital rule includes a common equity tier1 minimum risk-based capital requirement, a minimum tier 1 risk-based capital requirement, a minimum total risk-based capital requirement, a minimum leverage ratio of tier 1 capital to average total consolidated assets, and, for banking organizations subject to the advanced approaches risk-based capital rules, a supplementary leverage ratio that incorporates both on- and off-balance sheet exposures. The regulatory capital rule also limits a banking organization's capital distributions and certain discretionary bonus payments to the extent that the banking organization does not hold a specified "buffer" of common equity tier 1 capital in addition to the minimum risk-based capital requirements. The FR 4200 information collection requires respondents to: (a) obtain legal opinions for certain agreements and maintain sufficient written documentation of this legal review, (b) obtain prior written approvals for the use of certain measures or methodologies, (c) maintain policies, procedures, and programs; (d) perform due diligence, perform and document analyses, or make a demonstration to supervisors; (e) develop plans for compliance and notify supervisors of certain changes; and (f) provide certain disclosures regarding their structure, regulatory capital, the risks to which they are subject, and other aspects of their operations. These obligations arise pursuant to sections .3, .22, .35, .37, .41, .42, .62, .63, .121 through .124, .132, .141, .142, .153, .171, and .173 of the regulatory capital rule (12 CFR part 217). Under most circumstances, IHCs would not be subject to the information collection requirements associated with sections .62, .63, .121 through .124, .132, .141, .142, .153, .171, and .173 of the regulatory capital rule.

10. *Report title:* Risk-Based Capital Guidelines: Market Risk.

Agency form number: FR 4201.

OMB control number: 7100-0314.

Frequency: On occasion.

Reporters: Banking organization, including U.S. intermediate holding companies (IHCs), with aggregate trading assets and trading liabilities equal to (1) 10 percent or more of quarter-end total assets or (2) \$1 billion or more.

Estimated annual reporting hours: Prior written approvals reporting: 28,800 hours; policies and procedures recordkeeping: 2,880 hours; trading and hedging strategy recordkeeping: 480 hours; internal models recordkeeping: 3,840 hours; section 4(b) backtesting and stress testing: 1,920 hours; sections 5(c) and 9(c) backtesting and stress testing: 3,120 hours; securitizations backtesting and stress testing: 14,400 hours; disclosure policy backtesting and stress testing: 1,200 hours; quantitative disclosure: 1,920 hours; qualitative disclosure: 360 hours.

Estimated average hours per response: Prior written approvals reporting: 960 hours; policies and procedures recordkeeping: 96 hours; trading and hedging strategy recordkeeping: 16 hours; internal models recordkeeping: 128 hours; section 4(b) backtesting and stress testing: 16 hours; sections 5(c) and 9(c) backtesting and stress testing: 104 hours; securitizations backtesting and stress testing: 120 hours; disclosure policy backtesting and stress testing: 40 hours; quantitative disclosure: 16 hours; qualitative disclosure: 12 hours.

Number of respondents: 30.

General description of report: This information collection is mandatory pursuant to 12 U.S.C. § 324 and 12 U.S.C. § 1844(c), section 165 of the Dodd-Frank Act (12 U.S.C. § 5365), and section 252.153(b)(2) of Regulation YY (12 CFR 252.153(b)(2)). Information collected pursuant to the reporting requirements of the FR 4201 (specifically, information related to seeking regulatory approval for the use of certain incremental and comprehensive risk models and methodologies under sections 217.208 and 217.209) is exempt from disclosure pursuant to exemption (b)(8) of the Freedom of Information Act (FOIA) (5 U.S.C. § 552(b)(8)), and exemption (b)(4) of FOIA (5 U.S.C. § 552(b)(4)). Exemption (b)(8) applies because the reported information is contained in or related to examination reports. Exemption (b)(4) applies because the information provided to obtain regulatory approval of the incremental or comprehensive risk models is confidential business information the release of which could cause substantial competitive harm to the reporting company. The recordkeeping requirements of the FR 4201 require banking organizations to maintain documentation regarding certain policies and procedures, trading and hedging strategies, and internal models. These documents would remain on the premises of the banking organizations and accordingly would not generally be subject to a FOIA request. To the extent these documents are provided to the regulators, they would be exempt under exemption (b)(8), and may be exempt under exemption (b)(4). Exemption (b)(4) protects from disclosure “trade secrets and commercial or financial information obtained from a person and privileged or confidential.” The disclosure requirements of the FR 4201 do not raise any confidentiality issues because they require banking organizations to make certain disclosures public.

Abstract: The market risk rule is an integral part of the Board’s regulatory capital framework. The collection of information permits the Federal Reserve to monitor the market risk profile of banking organizations that it regulates and evaluate the impact and competitive implications of the market risk rule on those banking organizations and the industry as a whole. The collection of information provides the most current statistical data available to identify areas of market risk on which to focus for onsite and offsite examinations and allows the Federal Reserve to assess and monitor the levels and components of each reporting institution’s risk-based capital requirements for market risk and the adequacy of the institution’s capital under the market risk rule. Finally, the collection of information contained in the market risk rule is necessary to ensure capital adequacy of banking organizations according to their level of market risk and assists banking organizations in implementing and validating the market risk framework.

Current Actions: The Federal Reserve proposes to collect financial information for U.S. Intermediate Holding Companies (IHCs) of foreign banking organizations (FBOs) for the regulatory report forms listed above, beginning with the reporting period ending on September 30, 2016, to implement the enhanced prudential standards for FBOs adopted pursuant to

Subparts L, M, N, and O of Regulation YY to indicate and to certify to the Federal Reserve Board their compliance with those requirements.

With regard to the FR Y-14 series of reports, the IHC would be required to complete the FR Y-14 reports in the same manner as a BHC, and would be subject to requirements to report historical data with respect to its U.S. bank and nonbank operations. The reporting instructions provide IHCs with the submission dates for each of the FR Y-14 reports, including the onboarding filing delays that apply to certain schedules, and the requirements for reporting historical data for the FR Y-14Q Retail and PPNR schedules. IHCs will also receive this information in an onboarding memo. The historical data are necessary for the Board to perform a supervisory assessment of the capital plans of IHCs and to conduct supervisory stress tests. The Federal Reserve expects to address requirements for the Market Shock exercise, as they would apply to IHCs with significant trading activity, in a separate proposal.

However, many IHCs may have difficulty reporting historical data prior to formation of the IHC because of the structural reorganizations associated with complying with the IHC requirement. In addition, the ability of IHCs to report historical data may differ because compliance burdens may vary in complexity across IHCs. The Federal Reserve invites comment on the ability of IHCs to report historical data, including, but not limited to

- a description, with supporting detail, of any challenges that IHCs may face in providing historical data;
- specific compliance burdens for IHCs, such as issues related to systems integration or data retention policies; and
- whether an IHC would be able to report historical data if granted an extension of time, and if so, how much additional time would be needed.

Board of Governors of the Federal Reserve System, February 2, 2016.

Secretary of the Board.
